WV Department of Air Quality issues TransGas with Air Permit

Adam Victor, President of TransGas Development Systems said today, "Transgas is very excited by the issuance of the air permit by the WV Department of Air Quality for our Coal to Gasoline facility in West Virginia.

The project is more than just a construction project for Transgas. This is a technology project utilizing Uhde's PRENFLO PDQ technology, the world's premier gasification technology."

Victor went on to say, "This should show all American's the path towards American energy independence. We would like to thank West Virginia and specifically Governor Joe Manchin III, for helping lead the way towards American energy independence. We looking forward to continuing our great relationship with West Virginia ."
